HEART OF THE COMMUNITY

Community Forklift is a unique thrift store that sells used building materials. It is operated by the nonprofit Sustainable Community Initiatives. Community Forklift's mission is to lift up communities by providing them with low-cost quality building materials and to reduce waste by recycling building materials that would otherwise fill landfills. Donated building materials are tax deductible. For more information on what materials can be donated and for volunteer opportunities, call 301-985-5180 or visit communityforklift.com.
